

What is claimed is:

1. A video display system comprising:

a base portion;

a first hinge coupled to the base portion;

5 an arm including a first end coupled to the first hinge,

wherein the arm is movable about the first hinge;

a second hinge coupled to a second end of the arm; and

a display panel coupled to the second hinge, wherein the display is movable about the second hinge, the display panel

10 comprising a display.

2. The video display system of claim 1, wherein the display panel is latchable to the base portion, preventing movement of the display and arm.

15

3. The video display system of claim 1, wherein the display is faces towards the base portion in a latched position.

4. The video display system of claim 1, wherein the display
20 faces away from the base portion in a latched position.

5. The video display system of claim 1, further comprising a docking station for securing the base portion.

6. The video display system of claim 5, wherein the docking station comprises a control for releasing the display from a latched position.

5 7. The video display system of claim 5, wherein the docking station comprises a control for releasing the base portion from the docking station.

8. The video display system of claim 5, wherein the docking
10 station further comprises a door hinged along a side of the docking station for selectively concealing the video display system.

9. The video display system of claim 1, further comprising a
15 bracket for securing the base portion to a surface, the bracket comprising a hinge coupled to a first point of the base portion and a latch for selectively securing a second point of the base portion.

20 10. The video display system of claim 1, further comprising a media player for receiving a media comprising data to be displayed by the display.

11. The video display system of claim 1, wherein the first hinge is positioned along an edge of the base portion and the second hinge is positioned at a point between two opposing edges of the display panel.

5

12. A video display system comprising:

a base portion comprising a media player;

a display panel comprising a display, wherein the display panel is simultaneously moveable on an arc about a first point of the base portion and a plurality of second points defined along the arc, wherein the arc is on a plane perpendicular to the base portion; and

a docking station for securing the base portion.

15 13. The video display system of claim 12, wherein the docking station secures the base portion to a vehicle headrest.

14. The video display system of claim 12, wherein the docking station comprises a door for concealing the video display system.
